### We're Stuck Inside Because of the Weather... Now What?

This time of year can feel never-ending when the cold and gloomy weather makes it difficult to get outside.

Keeping children actively engaged helps prevent them from going stir-crazy or becoming bored. Here's a few ideas to help them (and you!) make it through the cold months while having fun together!

- Build a fort with blankets and sheets
- Play Hide and Seek
- Have a tower building championship and you don't have to stick with blocks! What other objects can you find to stack tall?
- Try a new recipe
- Have a dance party
- Create an indoor obstacle course
- Make slime! Click [here](#) for a recipe
- Create a scavenger hunt
- Build a sensory bin for your toddler. What is a sensory bin? Click [here](#) for ideas.
- Get some fresh air! It doesn't have to be for long. Get bundled up and spend a few minutes outdoors, jumping in the puddles or building a snow man!

For additional ideas, visit <https://busytoddlr.com/easy-activities-for-kids-stuck-at-home/>.

## Parent Project Podcast

Community Services for Children has been hosting the Parent Project Podcast to engage families in areas of common concern for parents. Experts provide perspectives on topics of health & safety, mental health, child transition and other important subjects.

This month, we are joined by Dr. Brown from the Children's Clinic at LVHN. Dr. Brown discusses promoting healthy sleep habits in young children. Click [here](#) to listen.

## Child Development

### Considerations for Finding Quality Childcare

As parents and guardians, we want to give our children every opportunity for a happy and healthy childhood. A foundation for future success can be attributed to selecting a quality childcare provider.

Whether you are a new family looking to establish care for the first time or a family that is looking to switch facilities, it is important to take some time to research the potential childcare program. A majority of that research can happen by scheduling a tour and coming prepared with questions or a checklist. ChildCare Aware of America has a checklist along with additional information to help families choose quality childcare. You can get a copy of the checklist by going to [Childcareaware.com](https://www.childcareaware.com). Some of the questions to ask when touring a program:

#### Infant Specific:

- How do staff track infant feedings?
- How is formula/breast milk stored in the classroom?
- How are babies put down to nap? (All infants should be placed on their back to sleep and have their own assigned crib)

#### Generalized for all ages:

- What qualifications/trainings do your teaching staff have?
- What items do I need to bring? (extra clothing, nap items, diapers, wipes, etc.)
- What is your illness policy? When can they return after illness?

Additionally, here are some items that you want to look for when touring a facility:

- Are there positive teacher-child interactions and respectful language?
- What is the overall condition of the facility and classroom materials?
- What is the building security/access like?

For more information on touring a facility, watch this quick video:

## Resource & Referral

The Affordable Connectivity Program is a federal program designed to help families who may be struggling to afford internet service. Having a reliable internet service is extremely important in today's interconnected world. The Coronavirus Pandemic has also shown us how important internet access can be to both school children and working adults.

In general, a household is eligible if the household income is at or below 200% Federal Poverty Income Guidelines, or if a member of the household is enrolled in an assistance program. Click [here](#) to for eligibility specifics and additional information on the program.

### Two Steps to Enroll

1. Go to [AffordableConnectivity.gov](https://affordableconnectivity.gov) to submit an application or print out a mail-in application.
2. Contact your preferred participating provider to select a plan and have the discount applied to your bill. (Some providers may have an alternative application that they will ask you to complete.)

Eligible households must both apply for the program and contact a participating provider to select a service plan.

## Health & Safety

### American Heart Month

February is a busy month for kids. Valentine's Day and Dental Health month are recognized in February, but it is also American Heart Month. This is a great opportunity to talk about keeping our hearts healthy!

Encourage children at home to be physically active. You can set up a quick and easy obstacle course in the living room or at the local playground, run relay races, take a bike ride, or learn how to do jumping jacks.

You can also introduce the importance of sleep and quiet time for a healthy heart, including yoga for kids. Another fun family activity is to create and cook heart-healthy recipes together. Talk about foods that keep your heart strong and healthy. You might also want to pick up some books from your local library about heart health and spend some quality time together reading a new book.

There are many more ideas included in the links below.

## February is National Children's Dental Health Month

### Choosing Healthy Drinks for Your Young Child

Choose drinks that will help keep your child healthy. Many drinks have natural or added sugar. Children who are often given sugary drinks are more likely to have tooth decay (cavities). You might not even know you are giving your child drinks with sugar! Water or milk are the best drinks for your child.

#### Tips for Choosing Healthy Drinks:

- Breast milk is best. Breastfeed your child for 6 months or longer.
- Give your child plain water with fluoride. Water from the tap (faucet) is safe and inexpensive.
- Give your child milk at scheduled meal and snack times.
- It is best not to put your child to bed with a bottle or sippy cup. If you do, the bottle or sippy cup should contain only water, nothing else.
- Give your child cut-up or whole fruit instead of fruit juice.
- If you give your child juice, wait until he is 6 months old. Offer your child no more than 4 to 6 ounces of 100-percent fruit juice each day. Serve juice in a cup.
- If your child drinks from a sippy cup, it should contain only water or milk, nothing else. By age 12 to 14 months, most children can drink from a cup.

For more information click [here](#).

## Family Engagement

### We are Learning in the Bedroom!

Learning happens everywhere, including when children are getting up in the morning and when they are going to bed at night. Here are some activities to help support your children's learning.

**Activities for Infants:** As you dress your baby, tell him what you are doing as you are doing it. Tell him, "The shirt goes over the head and one arm in and the other arm in the other sleeve, then cover your belly". (Social and Emotional Development)

**Activities for Toddlers:** Let your toddler pick out his clothes or at least one item. Ask him to identify where different items of clothing belong on his body. Do not forget things like mittens, hats and shoes. (Social and Emotional

Development)

**Activities for Preschoolers:** Using index cards , as you move through your child's room, have them name items and help them write the name of the items on the cards. Place the cards next to the items. (Language and Literacy Development, Writing and Reading)

**Activities for Kindergarteners:** Before bedtime, ask your kindergartner to draw a picture of what they think they will dream about. Take the picture and post it in the room so they can see it and ask them to tell you a bedtime story about their picture. (Language and Literacy)

**Suggested Books:**

- In My Bedroom by Carol Thompson
- The Berenstain Bears and the Messy Room by Stan and Jan Berensta
- Good Night, Gorilla by Petty Rathmann

**Resource: Learning is Everywhere:** Activities to do with young children.
